

Experts from Chişinău visited some industrial and energy facilities on the left bank of the Nistru River

On February 3 and 4, 2025, representatives of the Ministry of Energy, „Energocom”, „Moldelectrica”, „Vestmoldtransgaz” and the representative of the Bureau for Reintegration Policies, paid working visits to the city of Râbnîţa: to „Uzina Metalurgica Moldovenească” and „Combinatul de Ciment”, city of Tiraspol: „Tiraspoltransgaz”, Brick Factory, Tehnopark company and the „Tirotex-Energo” Thermal Power Plant, as well as the Thermal Power Plant located in the city of Dnestrovsk.

We remind you that in accordance with the provisions of the Decision of the Commission for Exceptional Situations (CES) No. 7 of February 1, 2025, from the assistance provided by the European Union (EU) to the Republic of Moldova to support residents on both banks of the Nistru River, „Energocom”, starting from 1 February 2025, purchases natural gas exclusively for consumption by protected categories of consumers, including household consumers, medical institutions, social centers, educational institutions and power plants.

Thus, following the visit carried out by experts in the energy sector, it was found that all industrial facilities visited in the cities of Râbnîţa, Tiraspol and Dnestrovsk are implementing the CES provision no. 7/2025, with no deviations being found in this regard.

At the same time, industrial facilities producing electricity, and those delivering natural gas, thermal energy, electricity and managing the respective networks in the eastern districts of the Republic of Moldova are operating normally, providing protected consumers with electricity, thermal heating and natural gas, in accordance with the requirements established by the regulatory framework in force.
