

Moldovan citizens working in Ukraine to be able to get pensions and other social benefits

Moldovan citizens who have worked in Ukraine, as well as Ukrainian citizens who have carried out their activities in our country, will be able to benefit from guaranteed social rights, including pensions and other benefits, for the periods worked in both states. The government has approved the initiation of negotiations in this regard.

The document establishes the mode of cooperation between the competent institutions of both countries so that the provisions of the Agreement are applied effectively and uniformly.

Therefore, the necessary conditions are created for individuals who have contributed to the social insurance system of the Republic of Moldova or Ukraine to be able to exercise their rights, regardless of the country in which they choose to live. It is estimated that around 20,000 citizens will benefit from this agreement.

The Republic of Moldova has signed similar agreements with 20 countries, including Spain, Italy and Germany. They provide social protection to Moldovan citizens who have worked abroad, ensuring them access to pensions and other mutually recognized social benefits.
