

Moldovan PM visits industrial area in commune from Chisinau municipality

Prime Minister Alexandru Munteanu today visited the industrial area in the Truseni commune, Chisinau municipality, where more economic projects are being developed. The PM discussed with entrepreneurs about their activity, cooperation with local authorities, and what improvements they want in order to grow their businesses.

Presently, more entrepreneurs are developing their businesses in the industrial area, including Nicolae Croitoru and Nicolae Savcenco, in the fields of furniture production and, respectively, the sale of construction tools and materials. The industrial area will also host other businesses – a textile factory and a warehouse for doors and windows will be opened here.

To support the activity of entrepreneurs, the Truseni mayoralty has facilitated the getting of permits and approvals, as well as the administrative procedures necessary to start the works.

Prime Minister Alexandru Munteanu emphasized that the industrial area of Truseni was an efficient model of cooperation and partnership with local authorities, who are actively involved in supporting the business environment.

“The courage and creativity of the private sector, in cooperation with local administration, bring concrete results for local residents. This means opportunities at home for families and young people, the growth of the local economy and a budget through which new projects for the community can be financed,” said Prime Minister Alexandru Munteanu.
