Thematic course "Post-Covid: available evidences and approaches to managing the post-COVID state" organized for professionals from both sides of Nistru

On 24 March, 2021, the health professionals from both banks of the Nistru river were trained within the online course " Post-Covid: available evidences and approaches to managing the post-COVID state", which was organized with the support of the World Health Organization.

The participants received all the necessary information on managing the post-Covid state of the people who were infected, actions to be taken, efficacy, consequences, long-term effects and practical approaches in treating the effects caused by SARS-CoV-2.

This thematic course ended the cycle of four information sessions on the requirements of the National Immunization Plan against Covid-19 and its organization was coordinated in advance by the health experts from Chisinau and Tiraspol.
