Road transportation experts discussed optimization of the process for registering means of transport with neutral license plates

26.03.2021, Chisinau – Following the discussions of 21 January and 10 March, a new online technical meeting of the working group for the development of road transportation and infrastructure was convened by the experts from both banks of the Nistru river.

The experts exchanged views on possible options for ensuring the proper functioning of the Vehicle Registration Points from Tiraspol and Ribnita, streamlining their activity, increasing the servicing and documenting capacity of a larger number of applicants and non-commercial vehicles.

The Moldovan side informed about the recently undertaken measures, among them the amendment of the national technical requirements to start in the near future the registration of trailers as categories of cars listed in point 1 of the Protocol Decision of 24 April 2018, the possibility of issuing registration certificates in shorter terms in the second quarter of 2021, aligning the provisions of the customs legislation to Law no.170/2018 in order to eliminate the age limit for imports of cars into the region, and separation of archives at the Ribnita subdivision.

Regarding the registration of re-equipped vehicles or when the ownership right was transferred to another person, the need to perform a comprehensive analysis of the technological processes and determine the potential ways to adjust them was mentioned.
