Almost 375 thousand doses of anti-COVID-19 vaccine have been distributed to beneficiaries from the left bank of river Nistru and Bender municipality

Following the systematization of actualized information about the anti-COVID-19 vaccine doses that have been distributed to inhabitants in the administrative units from the left bank of river Nistru and Bender municipality, we would like to specify that until the current day national medical institutions have distributed 374.497 doses, as follows:

Moderna – 5040 doses

AstraZeneca – 18 410 doses

Sinopharm – 25 001 doses

Johnson&Johnson/Janssen – 29 600 doses

Pfizer/BioNTech-Comirnaty – 49 446 doses

Sinovac – 65 000 doses

Sputnik V – 182 000 doses.

According to the existing mechanism, these batches of vaccines have been distributed under the orders issued by the Ministry of Health and proportionally with the population number residing in the eastern districts of the country.

Also, it is to be reiterated that medical institutions and workers from the region continue to continuously receive batches of humanitarian aid composed of protection supplies and high-performance equipment and are being constantly trained by medical specialists from Chișinău working together with the representatives of the World Health Organisation’s Bureau in the Republic of Moldova regarding the implementation

of efficient measures to immunize the population and manage severe cases of COVID-19.
