1677 pupils are studying in latin script schools in the Transnsitrian region

The situation in the 8 Latin script educational institutions in the Transnistrian region is under permanent control both Ministry of Education and Research and Reintegration Policies Bureau, with an absolute priority for the development of the educational process in an attractive and safe environment for children, for the teaching staff and the schools' board.

A positive trend of a slight increase of the pupils' number in the 8 educational institutions can be seen thanks to the constant efforts made by the authorities of the Republic of Moldova and the administration of educational institutions to improve the working conditions of teachers and pupils. In the current year, 1677 pupils study compared to 1650 (2021), 1573 (2020) and 1547 (2019).

In this context, in order to expand the good practices for carrying out an educational process, in accordance with the requirements of the Education Code of the Republic of Moldova and international standards that provide access to a legal and perspective educational environment for young students from the Transnistrian region, Chisinau expresses a justified interest in opening/reorganization of other educational institutions in the region, in accordance with the rigors in force, in order to diversify the educational offer on the left bank of the Nistru river and in Bender municipality.
