The forum ‘Boosting the absorption of European funds by the Republic of Moldova – EU candidate country’ took place today in Budesti village, Chisinau municipality

Head of the Assistance Projects Section of the Reintegration Policies Bureau, Eugen Cara, attended today the Forum ‘Boosting the absorption of European funds by the Republic of Moldova – EU candidate country’- an event organized in Budesti village, Chisinau municipality, and held with the participation of specialists from the Romanian Association of villages.

The purpose of the event is to support the authorities of the Republic of Moldova in the process of European Integration by establishing inter-institutional partnerships that would boost the absorption rate of the European funds (pre-accession), taking over the good practices of Romanian counterparts and expanding the cooperation network for future partnerships.

The representative of the Reintegration Policies Bureau expressed a message of support on behalf of the central public authorities for the localities involved in the implementation of the European development projects, referring particularly to those from the Security Zone, which are intended to bring closer not only the European integration of the Republic of Moldova, but also the reintegration of the country.

Eugen Cara has sincerely expressed his gratitude to colleagues from Romania who have always supported the European path of the Republic of Moldova and contribute essentially to the authentic Europeanization of our country.
