

Moldovan PM participates in Moldova-France Business Forum

Moldova is ready for investments and for long-term economic partnerships. Prime Minister Alexandru Munteanu has made statements to this effect at the Forum held within the Moldova-France Business Mission, organized in partnership with Business France. The event is dedicated to strengthening trade and investment partnerships between Moldovan and French companies.

The PM noted that the economic relationship between Moldova and France was a solid one, and the presence of French companies in the country proved the growing interest in the opportunities offered by the national economy. France ranks fourth among foreign investors, with the total value of French investments in Moldova amounting to approximately 190 million US dollars.

“French investors trust Moldova, which is becoming increasingly present on the European economic map. Today, our country is undergoing transformation, rapidly modernizing and aligning its economy, institutions and regulations with European standards. For investors, this means more stability and predictability. That is why, I invite you to see Moldova not just as a market, but as a European project under construction,” said the prime minister.

Alexandru Munteanu stressed that, in 2025, the national economy had recorded a growth of 2.4 per cent, and such sectors as information technology, modern agriculture, manufacturing and construction continued to develop dynamically, offering real opportunities for investment.

“The government is ready to be an active partner for the business environment. We want investors who build sustainable projects, create jobs, bring technology, innovation and added value to our economy. Moldova is not only looking for capital. Moldova is seeking long-term partnerships that develop our economy,” the prime minister added.

The Forum includes discussions on the economic future of Moldova, the role of financial institutions and the solutions offered by the French side for the development of the economy. The event also presents investment opportunities in the country and hosts meetings between companies from Moldova and France.
