Forty-one projects have been financed and forty have been implemented within the program of activities for the reintegration of the country for 2021

27.12.2021, Chisinau – 41 sustainable development and socio-economically impactful projects, worth 15 million lei, were financed thanks to the assignments approved by the Government through the Program of activities for the reintegration of the country for 2021.

The mentioned projects were selected out of a total of 143 files received in the stage of gathering of proposals (January 18 – February 19, 2021), reviewed and approved by the Commission for project selection, whose structure was established by government decision 24-d from 26.03.2021. The 41 winning projects were approved by government order 68 from 26.05.2021.

By the end of the calendaristic year, 24 beneficiaries have reported the integral implementation of the projects, 16 beneficiaries have realized half of the planned actions or more, and a project has not been initiated because the beneficiary authority has undergone a process of institutional reorganization.

Looking back at the projects we can mention that 14 of them, worth 5,36 million lei, have been destined to the development and modernization of the institutions within the education system, other 14 projects, worth 5,21 million lei, to repair or endow administrative buildings, institutions of culture, sport and medicine, and the rest, 13 projects worth 4,43 million lei to develop leisure areas and other public places.

According to the previous practices and given the specific conditions and difficulties the 8 education institutions teaching in Romanian from the Transnistrian region have to face, a sum of 100.000 lei has been directed to each institution as a one-time financial aid from the budget of the program. At the same time, two of these education institutions have enjoyed additional help, namely: the Theoretic Lyceum ”Alexandru cel Bun” from the Bender municipality has received 400.000 lei for repairs of the gym in the Bender study block of the boarding school for orphans and children left without parental care, and the Theoretic Lyceum ”Mihai Eminescu” from Dubăsari received 400.000 lei to replace the heating system in the study block II.

Taking into account the necessity to provide quality public services, as well as the pandemic context, 4 projects worth 1,59 million lei and aiming to assist medical institutions were financed. Among them is the project to provide thermal insulation to the building of the Rezina District Hospital, worth 1 million lei.

Another project of major importance destined to the population from the Security Zone, worth 1,6 million lei, concerned the acquisition and installing of technical equipment to ensure access to the national broadcasting space of the population living in ”shadow zones” from both banks of river Nistru, which because of the peculiar landscape cannot receive the signal of the multiplex A of nationally covered terrestrial digital television. Given objective reasons, the implementation of this project was impossible in the current year and it will be continued in the following period.

We remind that the Program of activities for the reintegration of the country has a budged of 15 million lei, making eligible those projects which are to be implemented in the Security Zone and which reflect specific activities, such as the regional and community development, rehabilitation and renovation of local infrastructure, modernization of key social institutions, solving of stringent development problems, providing essential public services, as well as actions which contribute to the promotion of measures of trust consolidation between the population from both banks of river Nistru and to the realization of the governmental objective to reintegrate the country.

Overall, in the period 2011-2021, 476 projects worth over 141 million lei were financed, and over 9 million lei were allocated to the 8 education institutions teaching in Romanian and situated in the Transnistrian region and in the perimeter of the

Security Zone.
