Training on clinical case management of persons diagnosed with COVID-19 was carried out for health professionals from both banks of Nistru

Healthcare workers from both banks of the Nistru river participated in another training session regarding the protocols for the clinical management of COVID-19 cases.

The key element of this course was guiding the specialists on prevention, treatment and control of COVID-19 infection, based on the latest additions and recommendations of the WHO and adapted to the evolution of the pandemic in the Republic of Moldova.

This videoconference took place under the auspices of the Regional and Country Office of the World Health Organization and as a continuation of the thematic training cycles, approved in accordance with the provisions of the National Immunization Plan against COVID-19.
