The representative of the Bureau has participated at an event in the Office of family physicians at Cocieri, Dubăsari district

On January 19, 2022, the senior consultant in the Bureau of reintegration policies, Malvina Condratiuc, has participated at the event of solemn opening of Roentgen diagnosis services in the Office of family physicians in Cocieri, Dubăsari district.

The provision of such medical services has been made possible thanks to a project titled ”Modernization of the Cocieri Office of family physicians with medical equipment”, financed through the Program of activities for reintegration of the country for 2020 (Government Decision no. 256/2020) and which has been realized in order to increase and diversify medical services provided by the said territorial subdivision according to European standards, by enhancing quality of the medical performance and prompt response to the needs of the population in the service area including inhabitants of the Transnistrian region.

The existing mobile digital radiologic device belonging to the Office of family physicians has been provided with additional accessories, such as a table and a vertical stand for x-ray investigations, which allows improvement and enhancement of the scope of performed investigations.

The project has been a part of the government’s efforts to make a significant contribution to the process of ensuring access of the citizens to quality and high-performance medical services aimed at protecting health of citizens and prevent potential risks in this regard, including from the perspective of strengthening confidence building measures between residents on both banks of the Nistru river.
