The dynamics of import-export operations carried out in the EU member countries, during the period 2014-2021, by companies from the Transnistrian region

As it is known, the European Union (EU) is the most attractive and active destination for commercial-economic transactions carried out by companies from the Transnistrian region, which are registered by the Public Services Agency and possess licenses and permits issued by the relevant authorities of the Republic Moldova.

The dynamics of imports and exports from/to the EU during the period of 2014-2021 is presented as follows:

Reference year

2014

2015

2016

2017

2018

2019

2020

2021

Share of imports from the EU

47,17%

38,78%

46,07%

32,73%

26,16%

32,83%

36,22%

39,04%

Share of exports to the EU

64,30%

64,39%

56,12%

55,31%

58,10%

50,99%

56,60%

54,32%

Thus, we observe that the most intense period of exporting goods to the EU was in 2015 (64.39%), and importing from the EU in 2014 (47.17%); despite the daily percentage fluctuations, the EU remains the main destination for goods produced/imported in the eastern districts of the Republic of Moldova, emphasizing the increased interest of the economic agents from the region to have business relations with the EU and to operate according to the national regulatory framework.
