Documentation visit at the Telița Gymnasium-Kindergarten, Anenii Noi district, which has accessed a project within the Program of Activities for the Reintegration of the Country for 2022

The representatives of the Bureau of Reintegration Policies Aurelia Barbaroș and Ivan Țurcan made a working visit to the Telița Gymnasium-Kindergarten, Anenii Noi district to attend the inauguration of the new sports hall.

The works carried out in the physical education hall took place thanks to the 500 thousand lei allocated through the Program of activities for the reintegration of the country from 2022 (approved by Government Decision no. 410/2022), but also as a result of the contribution of local public authorities.

Consequently, more than 150 children who attend the educational institution will enjoy better and safer conditions for conducting physical education classes, which will contribute to raising the attractiveness of the educational institution and the potential increase in the number of children.

We remind that through the Program of activities for the reintegration of the country, projects approved by the Government to be implemented in the localities within the perimeter of the Security Zone are eligible for funding. Over the years, the mayor’s office of Telița implemented 7 community development projects, the budget of which amounted to 1, 6 million lei.
