Appeal of the Deputy Prime Minister for Reintegration, Olga Cebotari, on the vehicles subject

Dear citizens,

This is to comment on convening the next meeting of the experts on road transportation.

Given the messages spread in some media sources from the left bank of Nistru that the Moldovan side is delaying to convene the next meeting of the working group for the development of road transportation and infrastructure, we would like to remind that the last experts' meeting took place on 21 January, this year. See: https://gov.md/ro/content/grupurile-de-lucru-pentru-dezvoltarea-transportului-auto-si-infrastructurii-drumurilor-s-au

The information campaign on participation of the motor-vehicles from the Transnistrian region in the international road traffic was launched on 25 January.

The relevant national authorities examined and carried out consultations on the issues identified by experts from Chisinau and Tiraspol during the assessment visit of the activity of the Vehicle Registration Point from Tiraspol, that took place on 7 October, 2020. The corresponding proposals were submitted today in a letter addressed to the political representative from Tiraspol, in copy with the mediators and observers in the negotiation process.

The actions on this matter are to be coordinated at the technical level and implemented in compliance with the legal framework in force and the requirements of the Vienna Convention on Road Traffic of 8 November, 1968.

After conducting final consultations with the relevant authorities, Chisinau will propose organization of a new working meeting in this dialogue platform. All the stakeholders of the 5+2 negotiation format were previously informed about this.

The authorities of the Republic of Moldova have always proven a responsible attitude in solving the urgent problems of the residents on both banks of Nistru. Their efforts are directed towards restoring unique national spaces, complying with the laws in force throughout the country and implementing the commitments agreed in the negotiation process.
