The Joint Control Commission resumed its work in Bender after a break of more than a month

Members of the Joint Control Commission continued discussions on the implementation of previously agreed actions regarding the two posts of the Joint Peacekeeping Forces located in the proximity of Vadul lui Voda.

The planned actions involve the re-location of the peacekeeping post on the left bank of the Nistru so as to unblock the traffic artery on the Cosnita - Balabanesti route and to remove the obstacles hindering the movement of citizens and means of transport.

It should be reminded that the OSCE Mission in Moldova showed openness for the coordination and support of the planned measures. In this context, the Moldovan Delegation proposed to the parties to make a joint request for the Mission.

The Delegation of the Russian Federation did not support the initiative, but admitted the possibility of further consultations. The representatives of Tiraspol categorically opposed the proposal of the delegation of the Republic of Moldova.

Thus, without a consensus on the issue, the meeting was adjourned and the debates will continue next week.

Delegation of the Republic of Moldova to the Joint Control Commission
