Free movement to the Transnistrian region has been extended until 1 June

07.05.2021, Chisinau – As a result of an additional request, submitted through the dialogue channel of the political representatives in the Transnistrian settlement process, to maintain the unhindered movement to and from the localities on the left bank of Nistru and Bender, the party from Tiraspol informed about the extension of the free movement regime until 1 June.

Thus, the passage through the so-called Transnistrian checkpoints will be allowed without the need to follow the procedures applied until the end of April and without the preventive coordination with the local "crisis centers".

We would like to remind that the initial period of unrestricted movement was confirmed by Tiraspol for the Easter holidays during 30 April – 10 May 2021 (https://gov.md/en/content/free-movement-will-be-ensured-tofrom-nistrus-left-bank-localities-and-bender-municipality)

Chisinau will continue to intervene with prompt actions to restore free movement permanently and in compliance with the rules of individual protection in public spaces, in force during the pandemic period.
